

## DRAFT SMOKE CURTAINS

Aerosafe Draft Curtains are an effective solution designed to provide protection against smoke spread in commercial and industrial structures. Secured to structured steel, draft curtains ensure smoke and hot gases arising from the fire to be channelized to exhaust and extracting point.

## ADVANTAGES

- Customized designs to fit all requirements & layouts
- Lightweight: Reduction in load bearing
- Very easy in installation
- The Static Curtain entail a very low level of maintenance
- Draft Curtains are designed to cover unlimited width
