AeroSound® Dynamic+

Unleash unmatched performance with AeroSound® Dynamic+. This heavy-duty SBR/EPDM rubber tile, enhanced with 15% vibrant EPDM content, is engineered for outdoor applications and free-weight zones. Picture a floor that not only supports every move but also energizes your space with lively colors.

Upgrade your fitness experience with superior underfoot comfort - absorbing shocks, boosting resilience, and empowering every stride. Available in both interlock and classic tile designs, AeroSound® Dynamic+ combines customization with convenience, redefining your fitness space with both flair and functionality.

Available Colors

We offer customization in a wide range of colors, tailored to client requirements and subject to order quantity.

Indoor & Outdoor

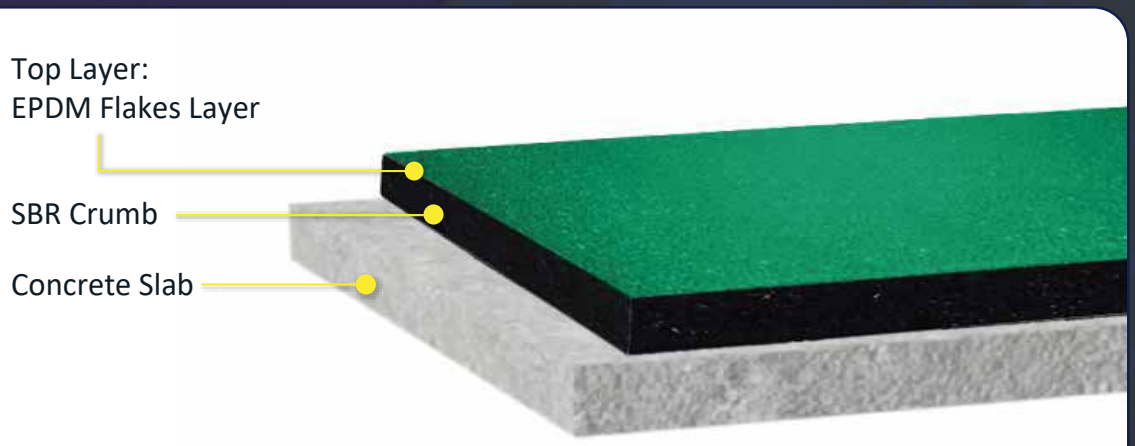

Tile Only

Square / Interlock

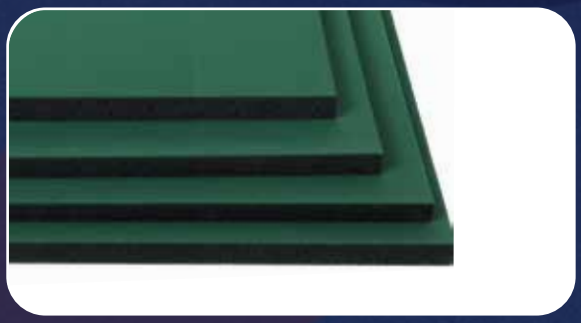

Thick 15 to 60 mm (19/32- 2-3/8")

Available sizes

500 mm x 500 mm	19.69" × 19.69"
1 m x 1 m	39.37" × 39.37"

AeroSound® Star*

AeroSound® Star is your go-to solution for hardcore workouts. This high-density SBR rubber tile is built to perform - absorbing impacts and reducing injuries with outstanding tensile strength. From heavy weights crashing to the floor to the pounding of your feet during intense cardio sessions, it stands firm, delivering unmatched protection and consistent performance. With excellent impact sound absorption, AeroSound® Star is tough, reliable, and ready for your most demanding training sessions.

Deep Impact Tile

Extremely high Density SBR rubber with higher tensile strength performance

Available Colors:

BLACK

We offer customization in a wide range of colors, tailored to client requirements and subject to order quantity.

1 m x 1 m	39.37" × 39.37"

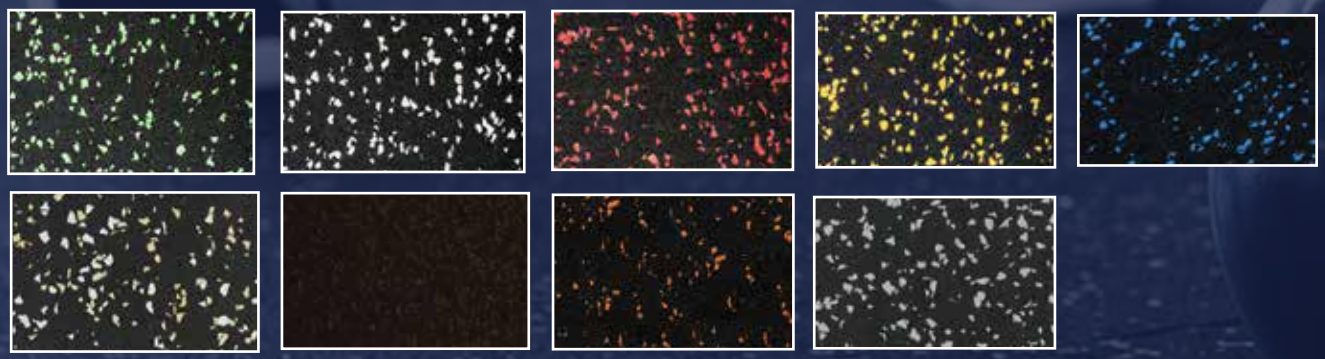

AeroSound® Dynamic Flakes

AeroSound® Dynamic Flakes represent a cutting-edge solution in flooring technology. Crafted from high-quality materials, these tiles boast a robust composition designed for optimal shock absorption, ensuring a resilient surface that withstands the rigors of diverse environments. The addition of colored flakes not only enhances visual appeal but also adds an extra layer of durability. With innate sound-absorbent properties, they are an ideal choice for spaces where noise reduction is paramount. Engineered with slip-resistant features, these tiles provide secure footing, prioritizing safety. Available in both tile and interlock shapes, AeroSound® Dynamic Flakes offer versatile installation options, making them a practical and efficient choice for various settings.

Available Colored Flakes:

We offer customization in a wide range of colors, tailored to client requirements and subject to order quantity.

AeroSound® Ballistic Rubber Tiles

1. High density, strength, and elasticity provide a safe live-fire environment.

2. Designed to stop bullets, the tiles help prevent ricochets and lead splash-back, thereby reducing lead dust generated from repeated range firing.

3. Manufactured using advanced Hot Mold Technology.

4. Effectively reduces airborne lead.

5. Suitable for covering floors, walls, and ceilings.

6. Compatible with rifle rounds up to .308/7.62mm. Each tile demonstrates outstanding durability, withstanding approximately 2,000 rounds before panel replacement is required.

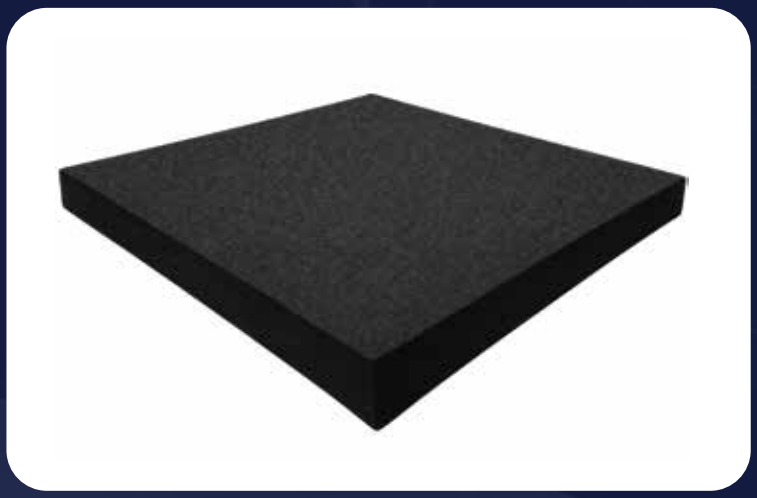

Applications:

1. Shooting ranges in gun clubs

2. Police stations

3. Army facilities

Why AeroSound® Rubber Flooring

Durability & High Performance - Designed to withstand heavy use in flooring applications.

Slip & Water Resistance - Ensures a safe and reliable surface.

Sound Absorption - Absorbs impact and reduces vibration effectively.

Equipment Protection - Prevents damage from weights and heavy equipment by acting as a buffer, prolonging the life of both machines and flooring.

Climate Adaptability - Superior UV-resistant coatings protect against temperature fluctuations, while moisture resistance helps prevent mold and mildew.

Hygienic & Easy to Clean - Maintains a safe and sanitary workout environment.

Stylish Designs - Available in a variety of styles to transform your space into a stunning fitness area.

Safety & Shock Absorbency - The AeroSound® range, made with premium raw materials, provides excellent shock absorption, ensuring joint protection and athlete safety.

Easy Installation - Simple and efficient to set up.

Different Applications

Kids Area

CrossFit facilities

Health clubs

Fitness centers
